CAREER OBJECTIVE

Final-year B.E. Information Technology student with hands-on experience in full-stack development, backend/API integration, AI/LLM integration, databases, cloud services, and automation. Experienced in building real-world applications through a 6-month Software / AI Engineering Internship at In2peta. Strong problem-solving and communication skills with a willingness to learn new technologies and contribute to impactful software products.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, FastAPI, REST APIs
Databases: PostgreSQL, SQLite, SQLAlchemy, Supabase, MongoDB
AI/ML: LLM Integration, Machine Learning, NLP, Scikit-learn, LangChain, Groq API
Cloud & Tools: AWS, S3, Docker, Git, GitHub, Postman, Vercel
Other: OAuth 2.0, Payment Gateway Integration, API Integration, Automation Workflows

EDUCATION

Progressive Education Society's Modern College of Engineering — **Pune, India**
Bachelor of Engineering,Information Technology — 2024 - 2027
Cumulative GPA: 8.5 / 10

EXPERIENCE

IN2PETA — **Remote(Hydrabad,India)**
Software / AI Engineering Intern — 2026

- Contributed across frontend and backend development, transitioning to backend engineering, API/LLM integrations, authentication, databases, and admin systems.
- Integrated multiple LLM providers and AI APIs to build AI-powered platform features and workflows.
- Built Google OAuth, user/purchase management, admin dashboards, and database workflows.
- Worked with AWS S3 and IAM for cloud storage and access management.
- Developing an AI-powered social media automation system for Facebook and Instagram, including content generation, scheduling, and publishing.
- Contributed to automated email workflows and cross-functional technical/non-technical initiatives.
  Strengthened skills in AI integration, cloud infrastructure, problem-solving, communication, ownership, and cross-team collaboration.

PROJECTS

BizBoost – AI-Powered Business Intelligence Platform — GitHub | Demo

- Developed a full-stack AI platform that analyzes large datasets to generate data-driven business recommendations using intelligent decision logic.
- Built intelligent analysis pipelines combining API integrations, AI models, and structured data processing for automated decision support.
- Designed scalable software architecture with reusable components, server-side APIs, and cloud deployment for production-ready applications.

Stack: Next.js, React, TypeScript, Tailwind CSS, Groq API, Supabase, Vercel

Moodify — GitHub | Demo

- Designed an end-to-end data processing pipeline integrating NLP models, recommendation algorithms, and external APIs for real-time inference.
- Designed an end-to-end inference pipeline that combines emotion classification, recommendation logic, and API-driven music discovery to deliver personalized user experiences in real time.

Stack: Python, FastAPI, SQLite, SQLAlchemy, HTML, CSS, JavaScript

AI Chatbot with Persistent Memory — GitHub

- Built a production-ready conversational system with persistent memory, modular architecture, and efficient backend data management.

Stack: Python, Streamlit, LangChain, Groq API, SQLite

CERTIFICATIONS

- AWS Cloud Practitioner Essentials — AWS
- Academy Data Analytics Job Simulation — Deloitte
- Advanced C++ — Spoken Tutorial, IIT Bombay

LEADERSHIP & ACHIEVEMENTS

- Finalist — Udyamotsav (AICTE & MoE), selected from over 10,000 start-up entries.
- Active contributor in Google Developer Groups, collaborating on cloud technologies, engineering workshops, and technical problem solving.
- Smart India Hackathon - Top 10 in internal SIH 2024(Web Based Applicant Simulation Software for DRDO)
